

Life

Out of Contest

Testo e musica di Stefano Marchitello

Hey you, that call my name,
distracted and a little strange
you're growing in my mind
bad things and so you have to count to five

I dream for you, my friend
all the dreams you have in your head
You think you won't even try
I don't leave you in this night

cause I'm a life! I'm just a little point that's growing in the sky
I'm a life! I'm just a little point that's growing in the sky

I want to stay in your brain
of love is full my way
I've just felt your mood and what binds you hard with a chain

I could turn on your light
you fell right down this time
no one can understand you more than me, don't close your mind

I want to see you dream
and this is what I feel
and don't try to justify yourself finding another way

don't tell me you have a fever
now just look up, don't bend down, fight

cause I'm a life! I'm just a little point that's growing in the sky
I'm a life! I'm just a little point that's growing in the sky
